-- CROSS-REFERENCE TO RELATED APPLICATION

This application is a continuation of US Serial No. 09/528,702, filed March 17, 2000, now US Patent No. 6,319,123, the entirety of which is incorporated herein by reference. --

REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance:

Applicant's invention is directed to a gaming machine that incorporates aspects of prerecorded video integrated into a standard matrix slot machine interface to provide game outcomes. Prior art teaches a traditional slot machine game integrated with a football or other sports games. The prior art gaming devices use the sports images to aid in game outcome determination, but differ in the application of the sports images. The instant invention's novelty lies in the use of a library of a plurality of series of non-identical images occurring at different sequential times during an event. In other words, each reel on a slot machine's payline would represent an image N of a time series of images that make a time sequenced event. A winning condition in the instant game happens when a particular event is designated a winning event,

and the game machine matrix array displays a time series of non-identical time sequenced images in the correct order and that series matches the said particular event.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
